Large Lot Residential Zone

Issues

The Large Lot Residential Zone (LLRZ) provides for people who wish to live in close proximity to Whangārei City and associated amenities, but prefer to live in areas that have a rural outlook, ambiance and amenity on a section large enough to achieve a high degree of privacy without being a maintenance burden. The Large Lot Residential Zone is a residential zone with a rural outlook. Infrastructure and *network utility operations* are located within, and in proximity to this zone.

The Large Lot Residential Zone is situated on the fringes between Whangārei City *Urban Zones* and Rural Production Zone, where there has traditionally been a demand for this type of lifestyle. In addition to providing a rural outlook for the residential enclaves, the uninhabited areas are being preserved for their recreational or conservation potential. Some of these areas contain *highly versatile soils*, so the protection of these areas for their food producing potential by avoiding fragmentation and over capitalisation of the land is also expected.

The clustered large lot residential enclave development pattern that is envisaged in the Large Lot Residential Zone constitutes the 'final form' of development for these areas. There is no intention that this will be a transition to a 'Future Urban Zone'. Accordingly, notwithstanding the proximity of any strictly 'urban' services (such as *reticulated wastewater* and water supply), Council will resist service expansion on the basis that it would constitute unplanned expansion of services beyond their predetermined limits.

Objectives

LLRZ-01 Living Opportunities

Provide opportunities for people to live in close proximity to Whangārei City and associated amenities, in a manner that safeguards rural character and ecological and productive values.

LLRZ-02 Character and Amenity

Preserve rural character and amenity whilst enabling large lot residential development.

LLRZ-03 Clusters

Maximise the extent of privacy, openness and rural outlook between residential clusters.

LLRZ-04 Reverse Sensitivity

Manage *reverse sensitivity* where the uninhabited spaces around clusters are, or can be, used for productive agricultural or horticultural activities.

LLRZ-O5 Non-Residential Activities

Small scale non-*residential activities* are provided for where their effects are compatible with a Large Lot Residential Zone.

LLRZ-O6 Site Size

Residential *site* sizes are no larger than necessary to provide sufficient area for dwellings, accessory *buildings* and curtilage.

Policies

LLRZ-P1 Rural Character and Amenity

To preserve rural character and amenity whilst enabling large lot residential development in a transitional zone and maintaining factors that contribute to rural character including:

1. Dominance of natural landforms with built features and roading subservient to and cohesive with these.
2. A sense of spaciousness.
3. Low *night* time light levels.
4. Dominance of natural features including landforms, watercourses, and vegetation.

LLRZ-P2 Earthworks

To manage the effects of soil disturbance, *dust*, and sediment runoff by limiting the maximum area of exposed *earthworks*.

LLRZ-P3 Reverse Sensitivity

To manage *reverse sensitivity* effects by preventing *sensitive activities* from being located in close proximity to the boundary of a Quarrying Resource Area, the Heavy Industrial Zone or the Rural Production Zone.

LLRZ-P4 Privacy and Sunlight

To maintain amenity, avoid dominance of *buildings* and loss of access to sunlight, and to maintain a high level of privacy by:

1. Managing the height of *buildings* and the height of *buildings* in relation to the distance from *site* boundaries.
2. Locating and orientating *building areas* to ensure each have a rural outlook.

LLRZ-P5 Highly Versatile Soils

To preserve the productive capacity of *highly versatile soils* by:

1. Limiting the extent of *building coverage*.
2. Requiring the indefinite retention of 50% of the *site*.
3. Requiring *subdivision* design and location of proposed *building areas* to be located on the least productive land.

LLRZ-P6 Biodiversity

To preserve rural character and amenity and to enhance biodiversity by protecting areas of *indigenous vegetation* and habitats, and precluding *earthworks* or the construction of *buildings* or structures in identified areas.

LLRZ-P7 Road Setbacks

To avoid ribbon development and maintain the rural outlook from state highways and roads shown on the planning maps, by ensuring *buildings* and *building areas* are *setback* from the road boundary.

LLRZ-P8 Residential Intensity and Yield of Subdivision

To avoid the loss of a sense of open space and rural outlook by:

1. Limiting the density of *residential units*.
2. Limiting the yield of *subdivision* to reflect a large lot residential intensity of development.
3. Requiring uninhabited spaces between residential clusters to be contiguous and protected in perpetuity.

LLRZ-P9 Non-Residential Activities

To protect character and amenity by restricting the establishment of non-*residential activities* and ensuring that any non-residential *ancillary activities* are of a design, scale and appearance that is compatible with a large lot residential context.

LLRZ-P10 Esplanade Areas

To protect esplanade areas and to reserve waterfront walkways by avoiding *impervious areas* adjacent to Mean High Water Springs and river banks.

LLRZ-P11 Site Size

To minimise the amount of unproductive land use and unnecessary curtilage by requiring additional residential *sites* to be as small as practicable.

LLRZ-P12 Clustering

To consolidate *built form* and locate new *building areas* near any existing or proposed *building areas* so as to maximise the extent of uninhabited space between residential clusters.

LLRZ-P13 Subdivision Design

To design *subdivision* and development to preserve rural character and amenity by:

1. Recognising and taking into account all *site* specific elements and features.
2. Requiring the maintenance and enhancement of any existing *indigenous vegetation* and habitats and natural waterbodies.
3. Recognising and maintaining any Sites of Significance to Māori.

LLRZ-P14 Environmental Enhancement

To consider multi-unit or infill development on those *sites* smaller than 2,500m² where higher densities of development are off-set by significant enhancement of natural and environmental features.

LLRZ-P15 Indigenous Vegetation

To preserve rural character and amenity and to enhance biodiversity by limiting clearance of *indigenous vegetation* or the disturbance of land in identified significant habitats.
